Training Course Overview

Engineers wanting to realise and develop untapped LEADERSHIP POTENTIAL must attend this highly interactive training course. This specialisation is designed for engineers who are interested in advancing into leadership and management roles. You'll develop awareness of your own strengths and weaknesses and emotional intelligence as a leader, and you'll learn to enhance your strengths and manage your weaknesses when you're placed in charge of a team or project. You'll also learn to improve the team and organisation cohesiveness to support everyone's success.

Training Course Objectives

By attending this Anderson training course, delegates will be able to:

- Determine your own strengths and weaknesses, learn ways to enhance your strength and to leverage on others' strength to close the gaps on weaknesses
- Practice Best fitting the Best Talent in the organisation
- Increase the circle of tolerance as a Leader and also to propagate the value to the team
- Learn to manage stress and perform critical thinking as a Leader
- Create a highly motivating team environment and no blame culture
- Identify his/her leadership style
