► Training Details

TRAINING COURSE OVERVIEW

In today's economy, firms compete with each other on the basis of the relative merits of their respective supply chains. Understandably, management accounting practices must support this reality rather than provide information that is rooted in traditional organizational settings and develop management accounting practices that facilitate their long-term sustainability.

This training course is intended to enable the delegates to acquire a solid foundation of Supply Chain Management Accounting (SCMA) and how to effectively implement Financial KPI's to the operational level of supply chain and logistics. The training course provides an overview of the most important requirements for preparing SCMA framework, with specific insight.

This training course will feature:

- Principles of Supply Chain Management Accounting (SCMA)
- Environment, Social and Governance Framework
- Operation cycle & Planning cycle
- Inventory Management and Cost Control
- Supply Chain KPI's

TRAINING COURSE OBJECTIVES

By the end of this training course, participants will be able to:

- Acquire the necessary skills and competencies needed to run efficiently firm's operations
- Understand the founding principles of Supply Chain Management Accounting
- Align corporate goals and objectives to operation cycle and planning cycle
- Set up appropriate KPI 's for senior and operational staff and determine the roles and responsibilities of performance review
- Mitigate operational risks
