► Training Details

Why Choose this Training Course?

This Defining & Managing Project Success training course is designed to present the basics of project management with a focus on understanding project management terms, project selection, planning, estimating, scheduling, and earned value management. If you are new to projects or been assigned to projects and need to understand how to manage the project, this is the training course for you. This training course will also cover the highlights of quality, risk and procurement. You will leave this training course with a full understanding of what project management is and how to manage a successful project.

This Anderson training course will feature:

- Review & understanding of common project management practices
- Hands on experience with the project charter, scope statement, & earned value management
- Appraisal of projects using project selection techniques, project chartering & gathering requirements
- Understand project management tools & procedures that can be implemented to improve or establish formal project management methodologies

What are the Goals?

By the end of this Anderson training course, participants will be able to:

- Understand the fundamentals of project management - the ability to initiate, plan & execute basic controls for a project
- Understand the techniques of project planning and how to deliver one
- Understand how to define project success using key performance indicators & quality metrics
- Identify risks and understanding the advantages of various types of contracts
- Understand how to control, manage and close a project to your customers satisfaction

Who is this Training Course for?

This Anderson training course is suitable to a wide range of professionals but will

greatly benefit:

- ▶ Those who are actually or potentially involved in projects
- ▶ Business professionals who currently work on projects or are occasionally assigned to work as project team members in any business work areas
- ▶ Those who directly contribute to projects. It is ideal for candidates who are intending to start managing projects soon, need to learn project management skills quickly, or need to know how to effectively select and manage projects

How will this Training Course be Presented?

This training course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. The course is highly interactive and is designed with briefings and a central project scenario as the driver for all course learning. Students will complete several elements of project work through assigned roles. Several work products will be created including a Scope statement, WBS, Risk Register, activity list, network diagram and earned value report. There will be open discussion and real world examples with the emphasis on learning by doing.
