Training Course Overview

Organizations that survived the COVID-19 are still facing high uncertainty in evaluating the impact of the pandemic on their programs and projects. This Post COVID Project Recovery Planning and Controlling training course will discuss new strategies, approaches and tools required for assessing the current situation and planning for the recovery of any troubled projects and programs. A mix of agile and traditional approaches shall be customized to plan, monitor and control the recovery, and for the way forward.

This Anderson training course will feature:

- Methods for the Assessment of Projects and Current State
- Defining the Objectives of the Recovery
- Tools for Planning and Implementing the Recovery
- Tools for Monitoring and Controlling the Recovery
- How to utilize the Enterprise PMO in the Recovery Process

Training Course Objectives

By the end of this Anderson training course, participants will be able to:

- Analyze and understand the the signs of troubles in your projects
- Be able to initiate the assessment and develop a recovery charter
- Develop a sound and applicable recovery plan
- Determine the appropriate tools to implement and control the recovery
- Understand the role of the PMO in the post COVID recovery

Designed for

This training course will benefit managers and teams involved in managing projects or governing the projects in the organization. Other stakeholders who need to understand the current state after the Pandemic and know how the recovery will be implemented such as finance directors, strategy office employees are also encouraged to attend.

This Anderson training course is suitable to a wide range of professionals but will greatly benefit:

- ▶ Program Managers and Project Managers
- ▶ Strategy implementation teams
- ▶ Risk Managers
- ▶ Functional Managers
- ▶ Project Sponsors and Executives

Learning Methods

This Anderson training course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. To serve the program goals a mix of different techniques will be used to energize the trainees such as lectures, power-point presentation, application on portfolio analysis tools, structured discussions, brainstorming sessions and case studies.
