04-08 Nov 2024	Amsterdam - The Netherlands	\$5,950
13-17 Jan 2025	London - UK	\$5,950

► Training Details

Training Course Overview

S&OP is a powerful tool for aligning business operations.

The modern business environment is a dynamic one.

This Anderson training course is designed to demonstrate the importance of a robust Sales and Operations process in a variety of business settings. Delegates will get an understanding of the importance of senior management commitment to the planning process and why it is vital to the success of any business. It is essential that the need to use manufacturing planning and control (MPC) processes is recognised at this level, to manage the relationships between sales and marketing groups on the demand side and the manufacturing and other operational departments on the supply side. Strong sales and operations planning (S&OP) processes can lead to more effective planning and greater achievement of operational plans.

Training Course Objectives

By attending this Anderson training course, delegates will be able to:

- Understand the importance of balancing supply and demand functions while recognizing the impact on financial targets
- Design a robust S&OP process for supply chain and service businesses
- Understand the importance of forecasts in S&OP
- Understand the importance of CEO involvement in S&OP
