Online Training Course Overview

Does Risk Management make any serious contribution to Business Performance? Do we really need to do it?

Risk Management is the way the organization balances the inevitability of risk in the pursuit of profit and objectives, with the need to protect its assets. By attending this Anderson online training course, you will be able to prepare for and manage in circumstances where foreseen and/ or unforeseen risks may be serious or even catastrophic. During the training course, you will learn about the common shortfalls and inadequacies in the treatment of risk, as well as how to do it well. Risk management is often conducted poorly, but if applied coherently and rigorously, can contribute extensively to performance and competitiveness of operations, and the whole organization.

Online Training Course Objectives

By attending this Anderson online training course, delegates will be able to:

- Appreciate the need for dangers and best practices associated with Risk Management
- Understand the role of Risk Management in contributing to performance and competitiveness
- Clarify the relationships between Risk Management and other functional areas
- Master the concepts, approaches, international standards, methods, and techniques for the effective implementation of Risk Management
- Discuss and learn the practical application of these best practices, through case studies and exercises
- Evaluate current provision & develop mechanisms to support application across the organization
- Guide organizational deployment
- Champion Risk Management at all levels of the organisation
