

An Introduction to Building and Maintaining a Sustainable Supply Chain

Applying the Principles of ISO 20400

► Training Details

Online Training Course Overview

This one day online course introduces the concepts of maintaining and building a sustainable supply chain in organisations. Supply chains combine many different functions and works towards supporting the end user. Without sustainable supply chains the organization will fail in its goal of achieving its aims and objectives; sustainability covers many aspects in organisations. This online training course pays particular attention to ISO 20400 which provides guidance to organisations, independent of their activity or size on integrating sustainability within procurement.

It is intended for stakeholders involved in, or impacted by procurement decisions and purposes. The ISO concerns itself with the environment, social and economic impacts possible over the entire life cycle.
