

Data Management, Manipulation & Analysis using Excel®

Excel with the Power of Data

► Training Details

Online Training Course Overview

Never before has data been so readily and freely available. From our daily commute, to our morning coffee, to our daily purchases, to our business activities and personal achievements, data is generated. The availability of such rich data set afford fabulous opportunities to solve problems and lead to improvements in all aspects of our lives, especially in commercial activities. Such problem solving traditionally involved sophisticated quantitative skills. However, in every desktop computer through the world, lies an under utilised tool, and that tool is Excel.

In this Anderson training course, you will learn to how to use Excel to query data, test hypothesis, and solve sophisticated problems. By the end of the online training course, you will be conversant with 50+ Excel functions, a huge variety of charts and analysis tools.
