Online Training Course Overview

How can your organisation balance profits and sustainability?

Today's businesses can no longer ignore or simply pay lip service to Key Environmental, Social and Governance (ESG) issues - key stakeholders expect leading organisations to actively engage and manage these key areas of concern.

This leading edge Anderson online training course addresses the fundamental principles and provides the relevant insights to your organisation that needs to develop a sustainable approach to finance that will address these challenges and create value for the organisation, as well as its stakeholders and wider society.

Using proven learning techniques in a participative workshop format, an expert trainer will help you to develop the practical skills that you need to take part in this exciting development in business finance.

Online Training Course Objectives

By the end of this Anderson online training course, participants will be able to:

- Master the aims and principles of sustainable finance
- Understand key environmental, social and governance (ESG) issues
- Identify impact on business and financial strategy
- Develop meaningful tools for sustainable finance reporting
- Build financial models to assess sustainable finance and other risks
