Training Course Overview

Innovation. We want it, need it, and claim to practise it. The reality is often different though. Executives and other business leaders must be constantly on the lookout for new ways of doing business, improving processes, innovating products and services, and creating novel organisational solutions. It is needed in an increasingly competitive business environment. A key goal of this training course is to develop the ability to lead others in the steps of deliberate and pro-active innovation in all areas. But we don't just cover product or client-service innovation; we also look at all types of internal production and internal processes.

Training Course Objectives

By attending this Anderson training course, delegates will be able to:

- Appreciate continuous improvement and innovation
- Learn skills, knowledge and attitudes to plan, organize, conduct, control, and evaluate planned, deliberate change based on continuous process and product improvements
- Learn skills to search for changes in the external and internal business environments with a view to finding opportunities for performance improvement or innovation
- Understand and apply the full process of continuous improvement and innovation
- Appreciate leadership, focus, learning, trial and error, and adjustment

Designed for

This Anderson training course is suitable for:

- Line and functional managers, professionals responsible for strategy, marketing, business development, operations, HR, product development, and other functional departments within businesses and other organisations
- Intermediate and advanced level managers, team leaders and supervisors within all
