► Training Details

Training Course Overview

Success is not just about profit and returns on investment. Ethical principles now provide the foundations for various modern concepts for work, business and organisations, which broaden individual and corporate priorities far beyond traditional business aims of profit and shareholder enrichment. Regulations and the need for operational transparency, organizations are increasingly adopting the use of consolidated and harmonized sets of compliance controls. Ethical factors are also a significant influence on institutions and public sector organisations, for whom the traditional priorities of service quality and cost management must now increasingly take account of these same ethical considerations affecting the commercial and corporate world.

Training Course Objectives

By attending this Anderson training course, delegates will be able to:

- Show the benefits of ethical leadership
- Demonstrate the ethical leader in action
- Understand the importance of ethical leadership to personal well-being and team performance
- Determine the benefits to the organization
- Undertake Corporate Governance and Compliance issues
